## Project of the Month: Phoenix Biomedical Campus II: Health Science Education Building (HSEB)

PDI Construction is pleased to announce our participation on the HSEB project. This project is a Joint Venture between DPR and Sundt Construction. PDI is working as a subcontractor for Cannon & Wendt Electric. Our crews are currently potholing the site for existing utilities and will begin excavation in the neat future. This addition to the Phoenix Biomedical Campus is located at 7thstreet and Filmore.

## HIGHLIGHT OF THE MONTH: HORIZONTAL/DIRECTIONAL DRILLING

PDI Construction has a long history of providing safe, powerful and environmentally friendly methods for subsurface construction. Our core competencies include Horizontal Directional Drilling (HDD) and excavation. HDD allows us to install pipelines under roads, rivers and existing structures with minimal disruption-and only at the entry and receiving pits. Horizontal Directional Drilling is yet another example of what makes PDI Construction a "full service" dry utility contractor.

## The Tuesday Tun Run

PDI construction is celebrating our 60 year anniversary. In celebration of this milestone, we have planned a weekly event called "The Tuesday Tun Run." We invite you to join us as we meet each Tuesday at each location recently featured at [AZ Central](#). Our first event will be held July 20th at Four Peaks Brewery in Tempe. Locations have been selected throughout the valley for your convenience and our listed on our [Blog](#). We hope that you will be able to join us for at least one (if not more) of these weekly events.

## July Employee of the Month: Bobby Raimondo

This month, PDI received a call from one of our clients recommending Bobby Raimondo for July's employee of the month. Never before have we had an employee of the month work so hard to be selected as a stand out. Perhaps that parking space is a pretty cool perk! We appreciate that

our clients recognize all of Bobby's hard work. So this month we applaud Bobby and his work with our potholing crews. Thanks, Bobby!
